Okeanos Black Powder

What is Okeanos Black Powder?

Okeanos Black Powder is a non-toxic and environmentally friendly product that controls the growth of algae and aquatic plants in lakes and ponds. It prevents the excessive growth of algae and underwater plants, helping to keep your ponds clean and visually appealing.

Features and Benefits

- Transforms Your Pond into a Stunning Black Color: The black hue adds a reflective effect to the water, enhancing the elegance and value of your landscape.
- Reduces Algae Growth: Utilizes nano-technological ingredients to block sunlight, effectively reducing algae formation.
- Eliminates Harmful Chemicals: Removes the need for harmful chemicals such as chlorine.
- Easy Application: No additional equipment is required, making it simple to apply with practical application methods.
- Safe for Aquatic Life: Does not harm fish or other aquatic organisms.
- Year-Round Use: Safe to use in any season.
- Reduces Manual Labor: Minimizes the need for manual algae control.
- Highly Economical: More cost-effective than traditional disinfection chemicals.

Usage Instructions

Okeanos Black Powder is offered in water-soluble sachets, making it easy to calculate the required amount to color a pond or lake. Simply place the Okeanos Black Powder sachets in different areas of the pond. The sachets will dissolve, releasing the black dye into the water.
