OKEANOS BLUE NATURAL PRODUCTS

OKEANOSBLUE.COM

Foreword

As Okeanos, three engineers came together to share a vision of producing innovative, environmentally friendly solutions that not only meet the highest quality standards but also respect and protect our planet. Our products, such as Okeanos Blue Water, Okeanos AquaGuard, Okeanos Black Powder, and Okeanos BioClean, reflect our commitment to preserving aquatic ecosystems and our promise to provide cost-effective, high-performance solutions to our customers.

Quality is at the heart of everything we do. We ensure that our products are developed using the latest technology and undergo rigorous testing to meet industry standards. Our focus on environmental sustainability means that our products are designed to be safe for both humans and aquatic life, free from toxic chemicals, and aimed at enhancing the natural beauty of your water sources.

In today's competitive market, we understand the importance of cost efficiency. That's why our solutions not only deliver effective results but also provide economic benefits by reducing the need for expensive and harmful chemical treatments. By choosing Okeanos, you are investing in products that offer long-term savings and contribute to a healthier environment.

In this brochure, you will find detailed information about each of our products, all carefully designed to deliver the best results. We take pride in offering solutions that preserve the natural balance of water, keeping it clean, clear, and visually stunning.

At Okeanos Blue, while we prioritize visual aesthetics, we never compromise on our respect for the environment. We are here for a cleaner, more sustainable future with fewer chemicals.

Okeanos Products

About Usage Areas

1. Decorative Pools

Decorative pools are one of the most important elements of landscaping. However, the growth of algae and aquatic plants can disrupt the pool's appearance and create a dirty look. Okeanos products prevent the growth of algae and aquatic plants thanks to their harmless nano-technological components, keeping your pool clean and aesthetically pleasing. Okeanos products can be applied easily without the need for additional equipment and can be used safely in any season. Additionally, they offer a more economical solution compared to traditional disinfection chemicals, reducing costs while providing an environmentally friendly approach.

2. Ponds

Ponds play a vital role in supporting natural life, but excessive growth of algae and aquatic plants can endanger the health of the pond. Okeanos products contain pigments formulated with natural, harmless ingredients that not only transform your pond into stunning colors but also prevent the growth of algae. These products eliminate the need for harmful chemicals, ensuring a safe environment for the living organisms in the pond. The simple application method and the ability to use them year-round help you maintain your ponds in a clean and attractive state at all times.

3. Swimming Pools

Maintaining swimming pools after the summer season can be challenging both aesthetically and health-wise. Okeanos products allow you to preserve your pool without draining it throughout the winter. They provide an eye-catching color to your pool while preventing algae growth by absorbing sunlight. This eliminates the need for harmful and banned substances like copper sulfate. Okeanos products also reduce chlorine usage, offering a safer and more cost-effective solution. By keeping your pool clean and ready during the winter, Okeanos ensures a seamless transition to summer. When summer arrives, simply use chlorine to clear the color, and your pool will be crystal clear and ready for use.

4. Saunas

Saunas are essential spaces for relaxation and healthy living. Okeanos Sauna Essence, made entirely from natural herbal ingredients and enriched with the refreshing menthol of the Far East, creates a unique atmosphere in your sauna. Its formula is free from harmful chemicals, making it environmentally and health-friendly. With its strong and long-lasting scent, each sauna session becomes more enjoyable.

Offering both an eco-friendly and aesthetic solution, Okeanos Sauna Essences provide a nature-friendly sauna experience with their herbal content.

Okeanos Blue Water

What is Okeanos Blue Water?

Okeanos Blue Water is a non-toxic and environmentally friendly product that gives water a blue color with its pigments while controlling the growth of algae and aquatic plants in lakes and ponds. It prevents the excessive growth of algae and underwater plants, stopping your ponds from becoming polluted and visually unappealing.

Features and Benefits

- Transforms your pond into a stunning blue color
- Reduces algae growth by blocking sunlight with its nano-technological ingredients
- Eliminates the need for harmful chemicals such as chlorine
- Easy to use with simple application methods without the need for additional equipment
- Safe for aquatic life and pets that drink from the water (such as cats and dogs)
- Can be used safely in any season
- Reduces manual labor required for algae control
- Extremely cost-effective compared to traditional disinfection chemicals

How to Apply

Okeanos Blue Water is provided in liquid form, making it easy to calculate the necessary amount to color a pond or lake.

Add the recommended amount to your pool as specified in the usage instructions and wait for it to mix. You can increase the quantity depending on the desired color intensity. The dosage and duration of its effects are detailed in the usage instructions.

Okeanos Black Water

What is Okeanos Black Water

Okeanos Black Water adds a black color to the water with its natural pigments. It prevents algae formation by blocking the wavelength of sunlight that feeds algae. This product gives your pool a stunning visual appearance.

Features and Benefits

- Transforms your pond into a striking black color
- Provides visual beauty with a reflection effect
- Covers unsightly views at the bottom of the pool with its dark color
- Creates a sense of depth in shallow pools
- Enhances the visibility of objects above the water, making them stand out
- Reduces algae growth by blocking sunlight with its nano-technological ingredients
- Eliminates the need for harmful chemicals such as chlorine
- Easy to use with simple application methods, without the need for additional equipment
- Safe for use in any season
- Reduces manual labor required for algae control
- Safe for aquatic life and pets that drink from the water (such as cats and dogs)
- Extremely cost-effective compared to traditional disinfection chemicals

How to Apply

Okeanos Black Water is provided in liquid form, making it easy to calculate the required amount to color your pool.

Add the recommended amount to your pool as specified in the usage instructions, and it will mix within a few minutes. You can increase the quantity depending on the desired color intensity.

Okeanos Pink Water

ECO & PET FRIENDLY

What is Okeanos Pink Water?

Okeanos Pink Water adds a pink color to the water with its natural pigments. It prevents algae formation by blocking the wavelength of sunlight that feeds algae, giving your pool a stunning visual appearance.

Features and Benefits

- Transforms your pond into a striking pink color
- The pink hue is a rare water color, making it attention-grabbing
- Covers unsightly views at the bottom of the pool
- Reduces algae growth by blocking sunlight with its nano-technological ingredients
- Eliminates the need for harmful chemicals, such as chlorine
- Easy to use with simple application methods, without requiring additional equipment
- Safe for use in any season
- Reduces manual labor required for algae control
- Safe for aquatic life and pets that drink from the water (such as cats and dogs)
- Extremely cost-effective compared to traditional disinfection chemicals

How to Apply

Okeanos Pink Water is provided in liquid form, making it easy to calculate the required amount to color your pool.

Add the recommended amount to your pool as specified in the usage instructions, and it will mix within a few minutes. You can increase the quantity depending on the desired color intensity.

Okeanos Blue Shadow

What is Okeanos Blue Shadow?

Okeanos Blue Shadow adds a wavy blue color to the water with its natural pigments. It prevents algae formation by blocking the wavelength of sunlight that feeds algae, giving your pool a stunning visual appearance.

Features and Benefits

- Transforms your pond into a stunning wavy blue color
- With various shades of blue, it creates a more captivating and natural water appearance
- Reduces algae growth by blocking sunlight with its nano-technological ingredients
- Eliminates the need for harmful chemicals, such as chlorine
- Easy to use with simple application methods, requiring no additional equipment
- Safe for use in any season
- Reduces manual labor required for algae control
- Safe for aquatic life and pets that drink from the water (such as cats and dogs)
- Extremely cost-effective compared to traditional disinfection chemicals

How to Apply

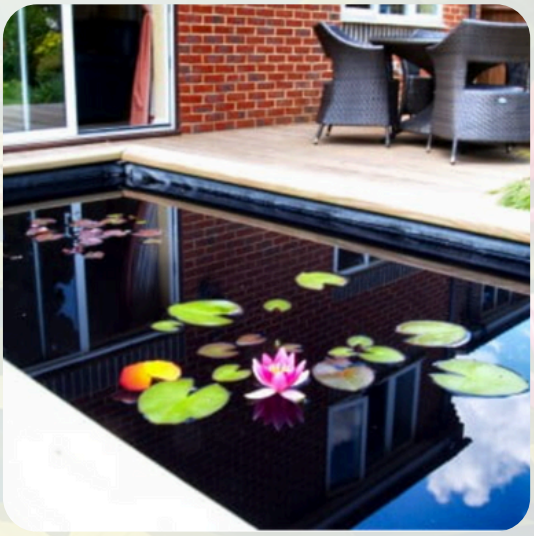

Okeanos Blue Shadow is provided in liquid form, making it easy to calculate the required amount to color your pool.

Add the recommended amount to your pool as specified in the usage instructions, and it will mix within a few minutes. You can increase the quantity depending on the desired color intensity.

Okeanos Black Powder

What is Okeanos Black Powder?

Okeanos Black Powder is a non-toxic and environmentally friendly product that controls the growth of algae and aquatic plants in lakes and ponds. It prevents excessive growth of algae and underwater plants, stopping your ponds from becoming polluted and visually unappealing.

Features and Benefits

- Transforms your pond into a stunning black color
- The black hue adds a reflection effect, bringing elegance and value to your landscape
- Reduces algae growth by blocking sunlight with its nano-technological ingredients
- Eliminates the need for harmful chemicals such as chlorine
- Easy to use with simple application methods, requiring no additional equipment
- Safe for aquatic life and pets that drink from the water (such as cats and dogs)
- Can be safely used in any season
- Reduces manual labor required for algae control
- Extremely cost-effective compared to traditional disinfection chemicals

How to Apply

Okeanos Black Powder is provided in water-soluble pouches, making it easy to calculate the required amount to color a pond or lake.

Simply place Okeanos Black Powder in different areas of the pond. The pouches will dissolve, releasing the black dye into the water. Dosage, duration of effect, and application techniques are detailed in the usage instructions.

Okeanos BioClean

What is Okeanos BioClean?

Okeanos BioClean is a product made from natural and beneficial bacteria, designed to clean organic impurities in ponds. This special formula keeps your pond clean and healthy while maintaining the balance of the ecosystem.

Features and Benefits

- It effectively breaks down decaying vegetation and organic matter, decomposing the material accumulated at the bottom of the water.
- Cleans the silt layer and prevents it from reaccumulating.
- Reduces BOD (Biochemical Oxygen Demand) and COD (Chemical Oxygen Demand) levels while maintaining dissolved oxygen levels.
- Improves water quality and clarity.
- 100% safe for fish and other aquatic life.
- Reduces toxicity caused by natural chemical compounds.
- Cost-effective and easy to apply.
- Reduces unpleasant odors such as H_2S (Hydrogen Sulfide) and NH_3 (Ammonia).
- Easy to use and can be applied at any time of the day.

How to Apply

This product is packaged in 200-gram water-soluble pouches, making it easy to calculate the required amount. The water-soluble pouches are placed in water as specified in the usage instructions. Dosage and application methods are explained in detail in the instructions.

Okeanos BioClean

Beneficial Bacteria for Cleaning Ponds and Lakes

Okeanos BioClean is a product made from natural and beneficial bacteria, designed to clean organic pollutants in ponds. This special formula keeps your pond clean and healthy, while maintaining the balance of the ecosystem.

Okeanos BioClean is a safe, non-toxic, and easy-to-use product designed for those who know that algae are not only a visual problem but also a serious issue. It contains natural bacteria that are biodegradable and can be safely used in aquatic environments. These bacteria help maintain dissolved oxygen levels, reduce toxicity, eliminate unpleasant odors, remove suspended organic matter, clean the silt layer, and help control diseases.

The Bacillus bacteria in Okeanos BioClean are packaged and shipped in spore form, offering several advantages:

- Long-term, stable shelf life
- High tolerance to harsh environmental conditions
- Competitive strength against other microbes
- Ability to work synergistically with other Bacillus species and selected microbes
- Compatibility with other ingredients, allowing the creation of superior and unique formulations

When applied to a polluted pond or lake, the spores in Okeanos BioClean rapidly transform into vegetative cells. These cells begin to break down algae to sustain their energy. Okeanos BioClean Powder Bacteria is particularly effective at neutralizing excess nitrates that often pollute water, helping prevent the formation of blanketweed and duckweed.

Okeanos BioClean

About Potential Issues in Ponds and Lakes

In ponds and lakes, organic materials such as fallen leaves, uneaten food, grass clippings, and waste accumulate over time. These materials gradually decompose, turning into a thick, black layer of silt. This decomposition process increases the demand for dissolved oxygen, eventually depleting the oxygen levels in the water. As oxygen levels drop, unwanted by-products such as ammonia, hydrogen sulfide, nitrites, and nitrates are released into the water. These substances promote the growth of undesirable phytoplankton like blue-green algae.

Algae not only clog pumps and filters but also discolor the water, form green layers on the surface, and can have deadly effects on aquatic life. If left unchecked, this process can lead to further water quality degradation, harming the overall health of the pond or lake.

Solution: Preserving Nature's Balance

One common method to combat this issue is to reduce light penetration into the pond by using Okeanos Blue Water or Okeanos Blue Powder. Another highly effective solution is the application of natural bacteria through Okeanos BioClean. Bacteria, among the oldest life forms on Earth, are not only harmless but often beneficial. They are widely used in natural environments, as well as in domestic and industrial applications, to break down organic materials.

The natural bacteria in Okeanos BioClean multiply rapidly, doubling every 20 minutes. A single cell divides into two new daughter cells, and within 12 hours, the population can reach approximately 70 billion cells. Okeanos BioClean introduces millions of bacteria initially to kickstart the process. These bacteria quickly spread, breaking down excess organic matter and nutrients. As a result, water quality improves, clarity increases, and unpleasant odors diminish.

Okeanos BioClean

Storage

Store Okeanos BioClean in a cool, dry place, and protect it from direct sunlight. Avoid exposing it to freezing conditions. The water-soluble pouches containing Okeanos BioClean Beneficial Bacteria may become fragile under cold storage conditions.

Health and Safety

Wash your hands thoroughly after use. Avoid inhalation and contact with eyes.

Okeanos Aquaguard

What is Okeanos Aquaguard

Okeanos AquaGuard reduces or completely eliminates the invasive species Crassula helmsii. It is designed to control invasive aquatic weeds, and among its counterparts, it provides the most effective results in preventing the growth of Crassula helmsii.

Features and Benefits

- Reduces or completely eliminates invasive plant species in your pond
- Gives the water a dark blue color, preventing sunlight from feeding invasive plants
- Also used to slow down or stop the growth of Chara, a weed-like algae species
- Reduces algae growth by blocking sunlight with its nano-technological ingredients
- Eliminates the need for harmful chemicals such as chlorine
- Easy to use with simple application methods, requiring no additional equipment
- Safe for aquatic life and pets that drink from the water (such as cats and dogs)
- Can be safely used in any season
- Reduces manual labor required for controlling invasive plant species
- Extremely cost-effective compared to traditional disinfection chemicals

How to Apply

Okeanos AquaGuard is typically used in large ponds and is packaged in 250-gram water-soluble pouches. These pouches make it easy to calculate the required amount for use. The dosage and application method are detailed in the usage instructions.

Okeanos Aquaguard

Okeanos AquaGuard is Environmentally Friendly

Okeanos AquaGuard does not contain herbicides, pesticides, or algaecides, preventing excess nitrogen accumulation. Uncontrolled nitrogen can lead to algal blooms, where algae multiply in record numbers. These blooms can harm other plants and fish, posing a danger to other pond life. With Okeanos AquaGuard, you can enjoy a naturally beautiful and wildlife-friendly pond, offering you a safe environment free from harmful chemicals, perfect for spending time with your family.
